MixWorld

MixWorld is the first content platform in China built on Apple Vision Pro, pioneering an innovative exhibition experience in the era of spatial computing.

We are committed to reimagining traditional exhibition models through the integration of spatial computing and AIGC technologies, using digital methods to achieve low-cost duplication and an exceptionally immersive experience. This approach offers audiences highly cost-effective and engaging spatial exhibitions.

Our experience center, located at Shanghai's Baoshan Wisdom Bay, currently features "Wuxiang Zhijing" (Beyond Imagery: A Universe in a Moment), the only Apple Vision Pro-based MR immersive exhibition in the country.

www.mixworld.cn

Story

Story - Simplifying MR Content Creation

I. Powerful Creation Engine - 0 - Code Hollywood - level Spatial Effects

- * MR Large Space: Large - scale scene editing + object tracking & anchoring
- * Time Control: Multi - track timeline + keyframe animation
- * Creative Template Library: Dozens of spatial effect templates (particles, light/shadow, portal, etc.)

II. Empowering Creators for Cross - platform Growth

- * Offline MR: Effortlessly manage art shows, parent - child ed, brand stories, boosting brand influence.
- * Online Cross - platform: Customize content and publish on Vision Pro, Quest, Pico, etc.

III. Immersive Content Haven

Download Story to explore a wealth of spatial content: original 3D animations, immersive music flicks, stunning landscape vids, and more.

XAR

XAR is the first AR open-world game, offering native AR gameplay and social features integrated with real-world spaces.

XAR requires players to keep their cameras on at all times, blending physical environments with digital interactions. Players can battle monsters, grow flowers, and raise pets in AR, while also collecting voxel blocks to create AR objects. These objects can be permanently anchored in real-world spaces using cloud anchors and shared with other players.

In XAR, players explore, build, and share digital items within their physical surroundings. Future updates will allow players to customize game instances, trade AR creations, and build an infinitely scalable UGC-driven economy.

<https://x.ar/>

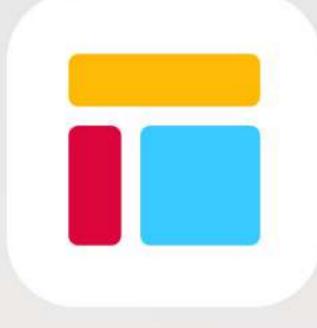

Fito

Fito is a gamified fitness app that supports 80+ types of sports, generates outdoor routes, and auto-syncs with Apple Health. Fito is also a cute bear. Much like Duolingo but for fitness, after you set your fitness goals, it tracks your streak and keeps you motivated through widgets and watchOS faces.

<https://apps.apple.com/app/id6596806184>

**Sequential Routine Studio**

Sequential Routine Studio is a tech innovation company dedicated to workflow automation optimization. By seamlessly integrating Apple Intelligence with traditional structured databases and no-code platforms, we empower businesses to efficiently manage their daily data operations. Our Airtable iOS App and Shortcuts Library enables users to rapidly build custom workflows, transforming manual tasks into one-click automated processes, significantly enhancing team collaboration efficiency.

<https://shortcuts.sequentialroutine.com>

**KikoCard**

KikoCard is an elegant text layout design app with beautiful templates for various needs. It excels in transforming text into appealing designs, ideal for social media posts, group announcements, and personal branding on platforms like Instagram and TikTok. Perfect for both personal and business use, KikoCard simplifies and beautifies text layout effortlessly.

<https://www.kikocard.com/>

JIYOUCE App

Do you remember your first journey?

The places you wandered, the landscapes that took your breath away...

Have those vivid travel moments begun to fade?

The awe of standing before mountain ranges, the thrill of discovering hidden-gem cafes...

Ever wished to capture every memory before it slips away?

"JI YOU CE" is here to help.

Simplify travel planning. Preserve beautiful moments. Collaborate with companions.

Begin crafting your personal travel story here. Happy adventuring!

<https://help.travel.suoxing.life>

Vis OKR

Vistudio is a dynamic tool for managing personal goals using the OKR (Objectives and Key Results) framework. Originally designed for corporate use, Vistudio reimagines OKR for personal growth. Unlike conventional to-do list apps, Vistudio focuses on the big picture of goal management. Its objective library, milestone tracking, and review features help you effectively organize, track, and reflect on your progress toward long-term aspirations.

<https://visionarytech.ltd>

**Context**

Context: AI-Powered Contextual English Learning App

92% of learners still rely on rote memorization with vocabulary books. Context redefines English learning with its AI-driven contextual approach, making language acquisition smarter.

As you read, AI predicts unfamiliar words and phrases, explaining them within context—no awkward translations. Notes are automatically organized, linking words across different contexts into a connected knowledge network. Forget interruptions from dictionary lookups or cluttered notebooks.

Re-encounter a word, and Context recalls its original context, boosting retention by 400%. Every reading becomes a review, supported by flashcards and future features like AI-generated stories and contextual exercises.

Context 2.0 is in beta. Join us to explore more!

<https://visionarytech.ltd>**Life Sticker**

Life Sticker - Instant Sticker Maker from Live Photos

Life Sticker is a delightful tool that transforms your Live Photos into animated stickers with just one tap. You can instantly share your creations to WeChat or save them to your photo library. Inspired by Laifu, our team's adorable dog, we've captured countless moments of him on our iPhones and turned them into expressive stickers using Life Sticker to add fun to our daily chats.

<https://visionarytech.ltd>

 锁屏启动

Lock Launcher is a powerful iOS productivity tool that lets you customize your own launcher. Easily access apps, shortcuts, payment codes, and mini-programs with a single tap. Featuring a minimalist design, rich widgets, and support for the latest system features like Camera Control, Control Center, and Dynamic Island.

Lock Launcher

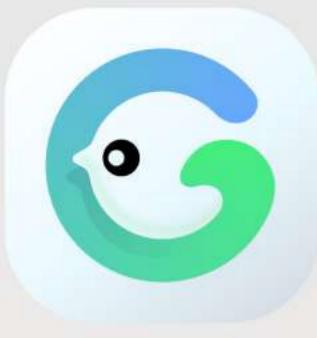

<https://locklauncher.com/>

 MUSIC MATE

Music Mate

<https://musicmate.fun>

Grow

Grow is your lovely Apple Watch companion! Automatically track steps, sleep, workouts, stress, hydration, and more. Join fun global challenges, earn hand-crafted digital badges, and enjoy a healthier, happier you.

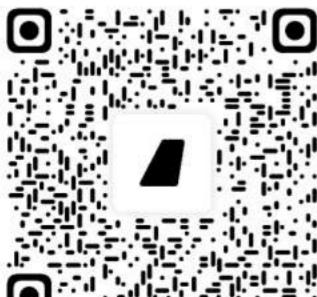

<https://apps.apple.com/cn/app/id1560604814>

FocusFlight

In a world full of distractions, Focus Flights offers a unique escape, transforming the way users approach focus and productivity. Seamlessly combining the thrill of aviation with the challenge of staying focused, Focus Flights is not just an app — it's an experience.

The idea for Focus Flights didn't just come from a brainstorming session — it came from lived experience. Both creators are intimately familiar with the struggles of ADHD, where focus can often feel elusive, but when found, can unlock incredible productivity. As aviation enthusiasts, they knew there was something powerful in the metaphor of flight: the clarity of a journey, the excitement of the destination, and the uninterrupted time between. And so, Focus Flights was born — a tool designed to help users navigate their focus in the same way they would a flight path, giving them control and concentration during their most important tasks.

<https://apps.apple.com/cn/app/focusflight-deepfocus-timer/id6648771147>

FocusFour

FocusFour is a task management app based on the Eisenhower Matrix, designed to help you focus on what truly matters. With seamless integration with Apple Reminders, it works effortlessly across iPhone, iPad, and Mac, ensuring your tasks stay in sync. Its minimalist yet elegant design makes task categorization intuitive, allowing you to prioritize with clarity and eliminate procrastination. With support for home screen widgets, you can stay on top of your tasks at a glance without even opening the app. Our goal with FocusFour is to empower you to take control of your time, channel your energy into what truly deserves your attention, and achieve a more focused and efficient life.

focusfour.app

**ZpeakUp**

ZpeakUp

ZpeakUp offers powerful features to improve your speaking skills. Our AI evaluates your speech performance in real time, delivering detailed insights and actionable feedback. Whether you're a student, an office worker, or anyone striving to master the art of presentation, ZpeakUp is your ultimate tool to conquer the stage.

【AI Speech Analysis】

ZpeakUp delivers instant analysis of your speaking skills in Cantonese, Mandarin, or English. It analyzes your speaking techniques, including eye contact, facial expressions, volume, pacing, and filler words, while also evaluating your script's arguments, structure, consistency, and word choice. Tailored to your speaking context, role, and topic, the AI provides scenario-specific assessments and personalized advice.

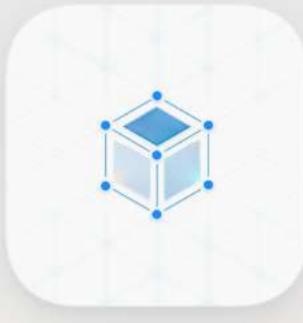

【Speech Preparation Toolkit】

ZpeakUp equips users with practical tools to build confidence and fluency: Pronunciation practice for clarity, Teleprompter for seamless delivery, AI scriptwriting to craft compelling content.

At ZpeakUp, we believe exceptional speaking skills are not innate—they're built through practice. Our AI demystifies the principles of good speech and replaces vague ideas with actionable advice.

<https://www.zpeakup.app>

nanoCraft

nanoCraft is a 3D modeling and AR visualization tool designed specifically for beginners, enabling children to easily create 3D models and showcase them in AR. While offering a simplified interface and templates, nanoCraft retains core functionalities like selecting, adding, and duplicating points, with a floating pad for precise model control. Once completed, children can refine their designs using drawing and illustration tools, supported by simplified UV mapping for easy texture application. Compatible with both iPad and Vision Pro, NanoCraft allows children to create freely in immersive environments, sparking their creativity and imagination.

LiveIt: Video to Live Photo

LiveIt: Make Still Moments Live

Everyone has those fleeting, precious moments they want to capture and share. As a photographer, I often feel that a still photo could capture any moment, but it lacks context, while a full video could be too much.

That's why I created LiveIt. It seamlessly blends the dynamic feel of video with the easy sharing of Live Photos, letting your memories leap off the screen. It's more than just a conversion tool; it's a whole new way to express yourself creatively.

The spark for LiveIt came when WeChat Moments began supporting Live Photos. What once seemed like magic straight out of Harry Potter's moving photographs became reality when Apple introduced Live Photos in 2017. I dreamed of a tool that could transform any video into these enchanting moments, easily shareable Live Photo across any social platform.

That's how LiveIt was born. It's not just another tool, it's an exploration into the world of dynamic imagery. We want to make it easy for everyone to embrace the beauty of motion, letting memories move and make sharing feel more alive.

<https://testflight.apple.com/join/MGP7eR1p>

Piecelet for NeoDB

Piecelet: Finding Our Cultural Constellation with Fediverse
Art, literature, films, and music have always been the threads that weave humanity together. As a targeted user of Letterboxd and Goodreads, I've experienced a kind of loss that you'll probably never experience - seeing my wishlists and inspired reviews suddenly disappear from the entire internet due to some Chinese regulations (I used to record everything on Douban, a Chinese Letterboxd + Goodreads platform).

This put me in a place where a desire for free expression and uncensored cultural records, inspired Piecelet for NeoDB; it embodies our longing for cultural freedom. Here, you can truthfully record the emotions a movie stirs in you, the thoughts a book provokes, and the chords a song strums on your heartstrings. By embracing the Fediverse ecosystem, ensuring your cultural footprint belongs only to you. In a way, Piecelet is a journey of self-discovery through culture, I hope to help more people find their own cultural constellation, a place where ideas can soar and creativity can blossom.

If you're searching for a place where you can freely express yourself, come join this open and inclusive cultural community. At Piecelet, rediscover your cultural mark.

<https://apps.apple.com/app/piecelet-for-neodb/id6739444863>

No Fusion

No Fusion is a reimagining of mobile photography - a professional camera designed for everyone.

With powerful features and ProRAW pipeline integration, it unlocks the full potential of your iPhone's camera.

Featuring DSLR-style interaction design, effortlessly adjust exposure and lock focus through efficient, intuitive controls.

Say goodbye to over-sharpening. Our unique HEIF+ format delivers crisp, natural-looking photos.

Full-format, full-resolution Live Photo support ensures you'll never miss a fleeting moment. Elevate your Ins with standout captures.

Manual Mode puts you in complete control: adjust focus, shutter speed, ISO, and white balance like a pro.

Choose from multiple themes, including classic designs that add tactile to your shooting experience.

An extensive collection of film simulation presets paired with FX effector lets you create stylized shots instantly - no post-processing required.

Highly customizable with function buttons, quick-access operations, and personalized themes/settings. Tailor every aspect to your shooting preferences.

<https://nofusion.app>

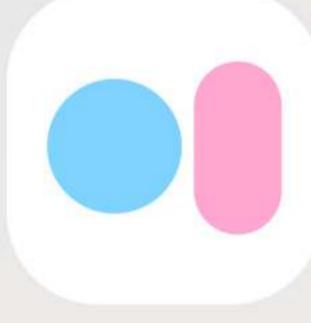

ME

"Me" is an app that integrates Apple's Fitness and Health data, providing users with multidimensional analysis of their exercise and health metrics. It covers key indicators such as workout data, heart rate, HRV, weight, BMI, and blood oxygen, with visualizations like heat maps and line charts. Powered by AI-driven insights, it offers in-depth analysis of workout performance. With 9 categories and 18 widget sizes, along with customizable backgrounds and icons, "Me" helps users create a personalized health dashboard for an enhanced experience.

[https://apps.apple.com/app/me-personal-health-assistant/
id6468550888](https://apps.apple.com/app/me-personal-health-assistant/id6468550888)

DottieNote

DottieNote is an efficiency tool that combines minimalist task management with creative focus timing. Simply flip your phone to start the timer and earn a unique planet upon completion, making focus more engaging and rewarding. With NFC stickers, it enhances interactivity and boosts motivation. Breaking the boundaries between traditional stationery and digital experiences, DottieNote makes every moment of focus more meaningful, helping you stay productive while enjoying the process!

www.dottienote.com

easy-meeting

Easy-Meeting aims to assist users in conducting lossless and synchronous conference communication by enabling functions such as multi-screen sharing across Mac and PC, 3D file preview, and realistic interaction, so as to improve collaboration efficiency.

<https://www.easy-meeting.top/download/>

Yetstudio

Yetstudio is a pioneering team dedicated to exploring the possibilities of spatial computing, committed to combining cutting-edge technology with creativity to deliver unique interactive experiences.

We have introduced innovative products such as Dino, the first Chinese input method for visionOS, Alchemist Lab, a virtual chemistry lab for spatial computing, and Pew Pew, a motion-sensing shooting game.

Spatial computing is redefining the connection between humans and technology. As a trailblazer in this field, Yetstudio is dedicated to leading the way and empowering users to experience the limitless potential of next-generation digital interactions.

<https://yetstudio.dev>

**MESON**

A Japanese startup providing "Immersive Presentation," a service that utilizes Apple Vision Pro to transform product showcases and brand messaging into immersive entertainment experiences.

MESON

meson.tokyo

Graffity

Graffity Inc. is a Tokyo-based AR entertainment company founded in 2017 with the mission "Play AR Play Real." It has developed hit AR shooting games like "Pecha Bato" (250,000+ downloads). Through Graffity AR Studio, the company supports AR business development with its expertise in planning and operations. Notable projects include "LOST ANIMAL PLANET" with NTT QONOQ and three Apple Vision Pro titles in 2024: "Ninja Gaze Typing", "Shuriken Survivor" and "Craftrium".

graffity.jp

GathXR

GathXR is an innovative XR (AR/VR/MR) content development company based in the United States, dedicated to providing customized solutions for clients with diverse needs. Supporting mainstream platforms such as Vision Pro and Meta Quest, the company's services span app development, game design, large-scale content creation, interaction design, animation production, and IP-based custom content development. In addition, GathXR owns its proprietary virtual pet application, Bola Pet, which integrates spatial computing and emotional AI technology to create vivid emotional connections and deeply immersive entertainment experiences for users, exploring the boundless possibilities of XR entertainment.

<https://www.gathxr.space>

GENISENSE STUDIO

Genisense Studio

Genisense Studio is a pioneering company in the field of spatial experience, specializing in spatial computing and visionOS projects. We pride ourselves on our team of skillful designers and developers, who possess extensive knowledge in both front-end and back-end development, extended reality, spatial computing, and the curation of spatial experiences.

Team members have collaborated with globally renowned technology corporations and top-tier design firms, working on a diverse array of projects that span various scales and complexities. This wealth of experience has enabled us to deliver cutting-edge solutions in the realm of spatial technology and design.

<https://www.genisense.cc/>

样板间

Let you more intuitively feel the placement effect of furniture and decorations in the room, such as whether the size is appropriate, whether the color and style match the environment, and so on; You can directly purchase suitable furniture on Taobao and JD platforms.

<https://apps.apple.com/cn/app/id6502940800>

Aqara

Aqara

The name, "Aqara" is derived from two Latin words: "Acutulus" (smart) and "Ara" (home). At Aqara, we're committed to creating holistic, personalized smart home experiences that are accessible to everyone.

As a global leader and pioneer in IoT, the Company offers one of the widest selections of smart products ranging from smart sensors to switches, curtain controllers, smart cameras and smart door locks. Winner of over 300 awards, Aqara's products are designed in-house and are equipped with cutting-edge hardware technology, sophisticated software design, and AI capabilities.

Aqara's solutions are designed to integrate seamlessly with major third-party ecosystems like Apple Home, Xiaomi Home, Amazon Alexa, Google Home and Samsung SmartThings, offering users unparalleled flexibility. Our products are especially tailored to provide the ultimate smart home experience and augment everyday life by making homes safer, more comfortable, sustainable, and adaptive to our evolving needs.

Aqara has over 30 products available in Apple Stores worldwide, with more than 10 categories and over 290 products that work with Apple Home. It is the brand with the largest number of products integrated with Apple Home and the most comprehensive experience scenarios in China.

Currently, the company serves over 13 million users across five continents.

Aqara.com

**Monstar**

Monstar is a tech innovation team that focuses on creating digital cultural products using animal-inspired character IPs within the MR (Mixed Reality) spatial computing environment. Our core team members come from the Digital Life Group at Tsinghua University's Maker Space Association.

We are the leading designers in MR and spatial computing who have the deepest understanding of human-digital life interaction. We are dedicated to providing users with the most immersive digital life interaction experience, constantly exploring core technologies and product innovations in areas like spatial intelligence, content generation, emotional computing, and scene interaction.

www.monstarai.com**Yuanmei Technology**

Yuanmei Technology, as an innovative pioneer in the field of spatial computing (3D digitization), focuses on Vision Pro technology and application innovation. With more than 8 years of AR/VR technology accumulation, we have deeply integrated cutting-edge technologies such as AVR, AI and computer vision to build a unique innovative application ecosystem.

At the commercial application level, Yuanmei Technology uses Vision Pro technology to create immersive marketing solutions for enterprises. Through MR experience, virtual showrooms and 3D product displays, product details and brand stories are presented to users in a very contagious form, enhancing brand appeal and product sales conversion rate. We have successfully created innovative projects for well-known brands such as JD.com, Taobao, Casarte, Audi, and Haier, setting benchmark cases in the industry. Recently, Yuanmei Technology has deeply participated in the Vision Pro innovative experience of CCTV Finance Automotive Festival and received wide acclaim. At present, we have successfully served more than 300 domestic and foreign first-line brands, helping companies achieve breakthroughs and innovations in the field of marketing.

We look forward to working with more partners to tap into the potential of Vision Pro in enterprise marketing and jointly create a new era of immersive marketing.

www.coolar.com

PaperMythXR

Paper Myth XR: Reimagining Chinese Paper Cutting with Mixed Reality

Paper Myth XR is a mixed reality (MR) interactive experience for Apple Vision Pro, integrating traditional Chinese paper cutting, AI-generated art, and spatial computing to reinterpret the ancient creation myth of "Pangu Separating Heaven and Earth." Through physical book reading, task-driven paper-cutting interactions, and dynamic storytelling, users engage with this intangible cultural heritage in an immersive way, preserving the tactile essence of paper cutting while exploring its digital evolution.

The visual design of Paper Myth XR combines AI-generated paper-cutting aesthetics with algorithm-driven morphing animations inspired by the traditional "Pan Chang Knot", symbolizing the transformation of Pangu's body into the natural world. As a showcase of cultural innovation within the Apple ecosystem, Paper Myth XR leverages advanced technology to redefine cultural engagement, opening new possibilities for the fusion of traditional craftsmanship and digital art.

<https://space.bilibili.com/3546848723732670>

FXG西顾

FXG was established in 2017 with the goal of bringing reality into virtual reality through Deep Immersive Visual Experiences (DIVE).

FXG developed the FM Duo immersive camera series, equipped with two full-frame sensors that enable stunning 12K 180° stereo or 360° experiences (both recorded and live-streamed). FXG's cameras are the top choice for high-quality productions worldwide. Notable users include Starflex in Korea, which utilizes the FM Duo to film K-pop superstars (BTS, Super Junior, Rolling Quartz), ByteDance in China, which produces immersive concerts for artists like Wang Feng and Zheng Jun, and GE Healthcare in the U.S., which is shaping the future of enterprise education—among many others.

Beyond hardware, FXG offers end-to-end solutions for both corporate and creative clients, covering everything from filming and app development to large-scale, location-based experiences. As one of the first immersive partners certified as an Apple Business Solution Provider (ABSP), FXG has developed innovative, full-scale solutions for world-leading brands, including Zara, Lilly Pharmaceuticals, AIA Group, and more.

If you're looking for cutting-edge tools to create immersive content—or a team to bring your vision to life—FXG is at your service. "Capturing Reality. Creating Realities."

<https://www.fxgvr.com/>

QuanDao

QuanDao is a social tool application that helps users make friends and discover themselves. On traditional social platforms, a person's labels—such as their education, job, income, or even appearance—seem to define the entirety of who they are. QuanDao is not that kind of product. On QuanDao, we use thoughtful questions to explore a person's inner world: their past experiences, inner monologues, interpretations of societal phenomena, and reflections on love, marriage, family, ideals, and self. Here, meeting new friends is not the sole objective—getting to know yourself is equally important.

<https://quandao.fixtime.com>

Immersive China

Immersive China – The Ultimate Virtual Travel Experience for Apple Vision Pro

- ✨ 16K Ultra HD – Stunning clarity, every detail brought to life
- 🌐 180° 3D Panoramic Views – Feel like you're truly there
- 🎥 Stereoscopic Video Technology – A fully immersive experience

Explore China's rich culture, vibrant cities, and serene landscapes from the comfort of your home. Our cutting-edge technology offers an unparalleled virtual journey—perfect for travelers, culture lovers, and those seeking a moment of peace.

<https://www.immersivechina.com/>

tomtoc

Founded in 2016, tomtoc blends digital gear protection with innovative design aesthetics.

We specialize in providing travel gear focused on protection and portability, offering tailored storage solutions for laptops, tablets, gaming handhelds, and other digital devices.

Our mission is to create exceptional travel and storage experiences through innovative products and services, with a continuous focus on design and quality - bringing safety, convenience, and comfort to every journey.

tomtoc.com

Canon(China) Co., Ltd.

Canon: Empowering creators with industry-leading technologies.

Canon has always been committed to providing high quality imaging and optical solutions. Since our founding in 1937, we have been the world's leading manufacturer of cameras, camcorders and professional video equipment trusted by creative professionals around the world.

We offer a wide range of products, from mirrorless cameras to high-end cinema-quality equipment such as the CINEMA EOS series. We continue to push the boundaries of imaging with cutting-edge technologies such as 8K video recording and Dual Pixel Autofocus.

In the field of VR, Canon has introduced the EOS VR System, which provides a higher quality and more efficient solution for capturing immersive and spatial 3D video.

Our RF5.2mm F2.8 L DUAL FISHEYE and RF-S7.8mm F4 STM, which support Apple's Spatial Video, enable immersive 180° VR video and Apple Spatial Video shooting, helping creators to produce high-quality immersive content and create a new viewing experience.

Canon will continue to help creators realize their dreams with industry-leading imaging technologies.

**Bonjour! Digital Card****Come Bonjour! Booth | Let's Back to the 1984**

- In 1984 at the Flint Center, Apple launched the 「 Macintosh」 marking the beginning of the great era of personal computers.
- In 2025 at LET'S VISION, Bonjour sets up the 「 Bonintosh」 art installation, echoing this great moment.

Come to "Digital 3C Zone B03" to interact with the 「 Macintosh」 art installation, go back to 1984 with us, and collect a limited NFC sticker.

And you'll see why 1984 won't be like "1984."

Bonjour! is currently a technology Builder/Founder on LinkedIn

- You can showcase your works, design philosophy, fragments of inspiration at 2 am, and even your beloved humanistic works in Bonjour Profile, thereby sketching out a vivid you, not just a "screw"
- Through AI capabilities, we will recommend friends with values and tastes that match yours, partners who think at the same frequency as you, and can Code with you all night, and interesting teams whose values and vision align highly with yours.

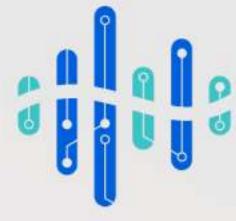

<https://bonjour.bio/>

**CANDYSIGN**

CANDYSIGN is a pioneering brand dedicated to exquisite aesthetics and versatile energy solutions. Guided by the philosophy that "Good Products are Candy", we seamlessly integrate technology, art, and fashion to empower the world's most creative and productive individuals. Our "products of tomorrow" harmonize exceptional design with human-centered values. Driven by adaptable technology and visionary design, we are committed to sustainability while unlocking the endless potential of digital energy.

<https://qk.shop111331.cn/ce2qmHQx>

**CyberTronics**

At CyberTronics, we harness AI to blend education, entertainment, and companionship, creating intelligent experiences that enrich daily life for all ages.

Our Cyber Stage brings this vision to life. By attaching NFC stickers to anime figures and stands, users create unique personas. Placing them on the Cyber Stage allows for real-time, interactive conversations with distinct voices and personalities, transforming toys into engaging companions.

Looking ahead, CyberTronics is dedicated to advancing AI technology, enhancing our products to deliver smarter, more personalized interactions, and shaping the future of intelligent play and connection.

wiki.aispea.com**GENELEC®**

GENELEC

Genelec was founded in Finland and has been committed to providing trusted audio monitoring solutions for sound creators since the introduction of its first active loudspeaker, the S30, in 1978.

With 47 years of focus and innovation, Genelec has become a recognized industry benchmark in the professional audio field, helping countless sound creators transform their inspiration into masterpieces.

Whether in music, film, game sound design, or research laboratory applications, Genelec remains the definitive standard by which creators measure sound quality.

genelec.com

**Sultan's Game**

Sultan's Game is a card-based simulation and narrative game, inspired by The One Thousand and One Nights. The Sultan forces you, his minister, to participate in a cruel game: draw one of four cards, and complete its challenge within seven days – or you will be executed. The Carnality Card pushes you into the pursuit of carnal pleasures. The Extravagance Card requires lavish spending to be fulfilled. The Conquer Card forces you into perilous adventures. Finally, the Bloodshed Card demands a human sacrifice.

You must find a way to complete these harsh trials – and weather its dire consequences. Familial betrayal, lustful madness, power struggles, and the loss of your own humanity threaten your sanity; the price of survival might end being too high...

<https://store.steampowered.com/app/3117820>**Kung Fu Card**

Kung Fu Card is a card game that blends Chinese Kung Fu with poker and mahjong mechanics, providing a modern experience in both PvP and PvE modes. Select your sect and hone your skills, defeat masters, and become the greatest Kung Fu master in the world.

<https://store.steampowered.com/app/3117820>

It's a story about after graduation life of college student. We guess it is a simulation game, besides which type of game it could be? We just want to provide a true real life with you in this way.

Unity Research Institute

Unity Research is dedicated to advancing real-time 3D technology and setting industry standards. We have trained over 2,500 engineers and built a strong R&D team with industry experts. Our Academy aims to push Unity engine boundaries through scientific and artistic research, offering professional courses and collaborating with academia and partners.

We focus on driving innovation in VR, AR, MR, and other interactive technologies to shape the future of real-time 3D. Our work in cutting-edge graphics, AI, user experience, and interaction design supports Unity and developer tools. This has significantly advanced game development and positively impacted real-time 3D applications in film, architecture, engineering, and healthcare.

Currently, we are developing the Unity+ ecosystem, which will provide a broader space for sustainable industry growth.

www.unityuniversity.cn

**Yestuarant**

"Yestuarant" is a game that tells the story of the late 20th century as it transitioned into the new millennium. The setting is a small city on the southeast coast. The protagonist unexpectedly becomes the owner of a restaurant for certain reasons, witnessing the changes in the lives of the diners coming and going in the city, as well as the dramatic transformation of the entire city.

<https://www.bilibili.com/video/BV14a411x7sX>**Death Ring: Second Impact**

Death Ring: Second Impact is a turn-based Roguelite strategy game. As the commander of the "Griffin" squadron, you must lead your Mechas and Pilots to resist the threat of mutated monsters and approaching to the secrets hidden behind the Death Ring.

https://store.steampowered.com/app/3415580/_/

**Guigu Studio**

Guigu Studio is a newly - emerging star in the gaming industry.

Guigu Studio's representative work, "Tale of Immortal", was launched on the Steam platform in January 2021. It sold 1.8 million copies in the first month, breaking the historical record of Chinese domestic single - player games. The peak concurrent players reached 184,000, ranking 35th in Steam's history, surpassing many triple - A titles. Guigu Studio mobile game was released in December 2024. On the day of its release, it topped the App Store paid game list No. 1, and the TapTap hot play list, the new product list, the hot-selling list and many other lists.

The company mainly focuses on self - developing and self - publishing buy - to - own PC/console games as well as buy - to - own mobile games. It has established favorable cooperative relationships with various game platforms, media, and console platforms. With the goal of continuously creating valuable games for users, it hopes to introduce Chinese culture to the global stage through games.

Action & Link

Action & Link

At Action&Link, we push the boundaries of interactive technology to create entirely new ways to engage with the digital world. Founded in Shanghai in 2023, we are pioneering the future of human-machine interaction with a clear mission: to advance interactive experiences through fundamental innovation.

Our first consumer product, the Action&Link Motion Controller, introduces a breakthrough in motion-based gaming. Powered by our world-leading interaction algorithms, it transforms how players experience their favorite games. From the intense action of Black Myth: Wukong to the vast landscapes of Genshin Impact, this controller brings motion-driven gameplay to any title—unlocking an entirely new dimension of control.

But this is more than just gaming. The Action&Link Motion Controller is designed to encourage movement, making screen time more active, more engaging, and more rewarding. By merging entertainment with exercise, we're turning virtual achievements into real-world well-being.

Sunset Hills

Sunset Hills is a narrative-driven puzzle game with a distinctive picture book art style. Players will follow the poignant journey of "Nico," a novelist embarking on a transformative trip after his military service.

Stepping into Nico's shoes, players will travel by train to various cities, reconnecting with former comrades and encountering a diverse cast of characters and events. Through solving intricate puzzles along the way, players will gradually come to understand the myriad aspects of life.

As Nico reunites with his former brothers-in-arms, now living vastly different lives, they reminisce about their shared wartime experiences. Unraveling the mysteries surrounding the war and Nico's past, players will slowly uncover the true purpose behind Nico's journey.

Sunset Hills is currently available on Steam and is open for pre-orders on the Apple App Store, with a full launch on the platform expected in the first half of this year.

**IRISLOFT****Flood of Light**

Flood of Light is a casual puzzle game with stunning graphics and a sweeping score. You control a mysterious girl who arrives at a city that is completely flooded with water. Only she possesses the ability to control light. By using her supernatural power you can solve various puzzles to gradually make the water recede and ultimately save the city. However, by doing so, the true purpose of this mysterious girl will also be slowly revealed to you.

<https://apps.apple.com/cn/app/id1121963448>**Misty Mountain Studio**

Misty Mountain Studio is an independent game development team under Shanghai Zhuyu Culture Communication Co., Ltd., dedicated to creating innovative gaming experiences. Led by Dr. Wei Xinyu, an AI Ph.D. and producer of the The Rewinder series, the team continuously explores new frontiers in game design.

The Rewinder: Launched on Steam in 2021 with subsequent releases on Nintendo Switch and Xbox (with Xbox Game Pass). This Chinese-style single-player pixel art adventure garnered 97% positive reviews on Steam, maintaining a 96% rating over the past year.

The Rewinder 2: The sequel continues the story two years after the events of The Rewinder. Transitioning from side-scrolling to a top-down perspective, the game introduces combat mechanics, character progression, and exploration elements. Expansive environments include deserts, bamboo forests, snow-capped mountains, and fishing villages, complemented by dynamic weather systems like snowfall and rain.

TOUCH FUTURE

Xueersi Online School

Touch Future XR Game Studio, a department of Xueersi Online School, is based in Beijing. The core team members, hailing from renowned companies in the industry, are dedicated to developing high-quality XR game content. Our recently launched game, 'Bottle Quest: 3D Match Game,' has earned widespread acclaim and love from players, winning the editors' recommendation on the Apple App Store for its outstanding quality and innovative, smooth gameplay.

Xueersi Online School, an online education brand under Good Future, a listed company on the New York Stock Exchange, provides quality education services for children aged 6-14. Since its establishment in 2008, it has accumulated more than ten years of teaching and research experience and learning data, accompanying the growth of tens of millions of children and spread by word of mouth among parents.

Xueersi Online School pioneered the "live streaming + tutoring" dual-teacher teaching model. Xueersi Online School is heavily investing in cutting-edge fields such as AI and immersive Internet technologies, continuously driving educational innovation. Continuously provide children with professional, diverse and interesting content

THRASHER

THRASHER is the inaugural Apple Vision Pro Game of the Year at Apple's 2024 App Store Awards!

THRASHER is an arcade odyssey and audiovisual experience with an innovative control scheme and mesmerizing alien world. Guide a magnificent space eel with the wave of your hand, evolving it from a tiny worm into a mega beast to take on wild bosses through 9 psychedelic realms. The game is designed both for casual players to vibe out in but also has a deep comboing system to keep score chasers competing on the leaderboards and perfecting their runs.

<https://thrashergame.com/>

Chinese Character Repairer

Chinese Character Repairer is a word finding and puzzle game product. Chinese characters are different from other characters in that they are made up of countless roots, and most people learning Chinese today do not know how to memorize Chinese characters in a regular way. This game adopts the method of searching for the roots of characters and putting them together to form combinations of characters, which is a clearer and more interesting way to convey the rules of the development of Chinese characters and Chinese culture to the players than similar Chinese character games.

**Xmind**

Xmind is an all-in-one thinking tool featuring mind mapping, AI generation, and real-time collaboration, pioneering the field for 19 years. Our vision is to empower individuals and organizations with innovative mind-mapping and brainstorming tools that enhance creativity and productivity.

As a long-term partner in the Apple ecosystem, Xmind has been featured as App of The Day and consistently ranks among the top iPad productivity tools, earning the trust and love of millions worldwide. In 2024, we introduced Xmind AI, bringing mind mapping to the web and enabling seamless cross-device collaboration. We also launched a suite of AI-powered features, doubling efficiency and putting AI at the service of creativity. Amid the rise of AI, our team remains committed to innovation, delivering greater value to users, society, and the world.

Xmind.cn**MiniMax**

MiniMax is a leading global technology company and one of the pioneers of large language models (LLMs) in Asia. Our mission is to build a world where intelligence thrives with everyone.

MiniMax develops proprietary LLMs across various modalities, including a trillion-parameter MoE model, a speech model with low latency and native support for major Asian languages, as well as advanced models for music, images, and video.

Leveraging these multi-modality general-purpose models, the MiniMax API Platform offers enterprises and developers secure, flexible, and reliable API services, enabling the rapid deployment of AI applications.

**TEN Framework**

TEN Framework, The Most Widely Used Conversational Voice Agent Framework.

Build any Voice Agent with TEN, unlock the power of voice !

Key Features:

- **Multimodal & Voice-to-Voice Support:** Support voice, text, and image input/output using advanced multimodal models.
- **Real-time Communication Optimized:** Optimized for low-latency, naturally interruptible interactions.
- **Global Extension Integration:** Seamlessly integrates with leading STT, LLM, and TTS modules for flexible development.
- **Cross-Platform Compatibility:** Supports C++, Go, Python, Node.js, ensuring seamless Agent integration across platforms.

Use Cases:

TEN empowers the creation of diverse Voice Agents, including: AI Personal Assistants, AI Emotional Companions, Computer Use (LUI), AI Spoken Language Practice, Smart Home Assistants, AI Call Centers, AI Game Master, and more.

**Lifelight – AI Companion**

Notion, but for life.

Lifelight aims to fulfill fundamental human needs – to be seen, to be heard, curiosity, and the desire for expression. Capture life's moments, ensuring your emotions are well cared for. Create a personal world of companionship, response, and reflection for you. As a life-recording companion, we document your remarkable journey and help you become the best version of yourself.

Our mission is to empower individuals with intuitive, caring AI companions that enhance emotional well-being and deepen self-awareness. By harnessing 'True Data' from daily life records, our personalized AI agents are designed to provide meaningful support, insightful revelations, and a stronger sense of connection in everyday life.

[Search for "Lifelight" on the App Store to experience it!](#)

**Liittle Shock**

Little Shock Studio, established in 2024, was founded by three tech enthusiasts who focus on solving life's small pain points with elegant AI tools. Their flagship product "Knowledge Collector" makes knowledge management lighter and more intuitive: after copying text or links, simply tap the back of your phone, and within 30 seconds, it generates knowledge cards or aesthetic wallpapers that automatically save to your album or preview in a pop-up window.

The team delves deep into AI agents, programming assistance, and anime-style art creation. With their "small but beautiful" design philosophy, they transform complex technology into silent daily rituals—intelligence shouldn't be noisy, but rather gently blend into everyday life.

clipai.online**StackNest**

StackNest - All-in-One AI Workstation

StackNest is a high-performance stacking device designed specifically for Mac users, providing robust computational support for the localized deployment of large language models (LLMs). Through innovative hardware stacking technology, StackNest significantly enhances the computing power of Mac devices, meeting the high-performance requirements for LLM training and inference while maintaining compactness and ease of use.

Key Features:

- **High-Performance Computing:** Expands the computational resources of a Mac through stacking technology, enabling the local operation of large-scale LLMs.
- **Plug-and-Play:** Seamlessly integrates with the Mac ecosystem, requiring no complex configurations, allowing for quick deployment of LLM applications.
- **Compact Design:** Uses a modular stacking design to save space while providing powerful computing capabilities.
- **Localized Optimization:** Specifically optimized for LLM localization scenarios, ensuring efficient and secure data processing.

Ideal for:

- AI developers and researchers
- Enterprise-level LLM localization deployment
- Small teams and individual users with high-performance computing needs
